DOE Awards Contract for Rocky Flats Records Management Services

Cincinnati -- The Department of Energy (DOE) today announced the award of a competitive, Small Business Set-Aside contract, to PM Tech, Inc., Arvada, Colorado for the management of records from the former Rocky Flats Environmental Technology Center. The contract term, with options, is for five years with a value of approximately \$13 million.

DOE operates a facility in Building 55 at the Denver Federal Center, Lakewood, Colorado for the purpose of maintaining and managing classified and litigation records from the former Rocky Flats Environmental Technology Site.

The DOE former Rocky Flats Site, near Denver, had a mission from 1953 to 1989 that was key to the nation's nuclear weapons production program. When the mission of the site changed from weapons production to cleanup and closure in the early 1990s, accelerated actions were performed to cleanup the site. DOE declared the physical completion in December 2005 and began final transition, transfer, and closeout activities. DOE's Office of Environmental Management (EM) transferred jurisdictional responsibility of the Rocky Flats Environmental Technology Site to the U.S. Fish and Wildlife Service in December 2007.

The contract award is for DOE's Office of Environmental Management-related matters. These records must be maintained in Colorado due to pending litigation by direction of the U.S. Department of Justice. Many of the records housed in Building 55 have lengthy retention requirements, some that are required to be maintained for decades.
